

CAL FIRE suspends burn permits in Humboldt, Del Norte, Western Trinity counties

August 8, 2023

After another wet winter and above average snowpack, warming temperatures and winds are quickly drying out vegetation. The increasing fire danger posed by the high volume of dead grass and hotter, drier conditions in the region is prompting CAL FIRE to suspend all burn permits for outdoor residential burning within the State Responsibility Area of Humboldt, Del Norte, and western Trinity Counties.

This suspension took effect July 31, and suspends all residential outdoor burning of landscape debris such as branches and leaves.

Humboldt – Del Norte Unit Chief Kurt McCray would like to thank all of those who have been burning safely this year. Chief McCray is also grateful for all the residents and groups who have worked with CAL FIRE to understand and obtain burn permits through this year's new online process. Safe burning of debris and prescribed fire are important tools to reduce hazardous wildland fuels. Warmer and drier conditions, along with increasing statewide fire activity, now warrant suspension of debris burning.

Since January 1, CAL FIRE and firefighters across the state have already responded to over 3,600 wildfires. While outdoor burning of landscape debris by homeowners is no longer allowed, CAL FIRE is asking residents to take that extra time to ensure that they are prepared for wildfires by maintaining a minimum of

100 feet of Defensible Space around every home and buildings on their property and being prepared to evacuate if the time comes.

Here are some tips to help prepare homes and property:

- Clear all dead and or dying vegetation 100 feet from around all structures.
- Landscape with fire resistant plants and non-flammable ground cover.
- Find alternative ways to dispose of landscape debris like chipping or hauling it to a biomass energy or green waste facility.

CAL FIRE may issue restricted temporary burning permits if there is an essential reason due to public health and safety. Agriculture, land management, fire training, and other industrial-type burning may proceed if a CAL FIRE official inspects the burn site and issues a special permit.

The suspension of burn permits for residential landscape debris does not apply to campfires within organized campgrounds or on private property. Campfires may be permitted if the campfire is maintained in such a manner as to prevent its spread to the wildland. A campfire permit can be obtained at local fire stations or online at [PreventWildfireCA.org](https://www.PreventWildfireCA.org).
