

Redwood National Park partners with the Department of Defense for restoration projects

July 7, 2023

Redwood National Park is seeking the assistance of the Department of Defense Innovative Readiness Training (IRT) program for renovations to the Prairie Creek Fish Hatchery and restoration of landscapes in the Prairie Creek Watershed. This work will take place in 2025.

The Prairie Creek Fish Hatchery was constructed in the 1930s to support commercial and sport fishing but has not been in operation since 1992. This project is part of a larger effort to restore the site for use as a training facility.

Notice is hereby given that Redwood National Park intends to submit a request for IRT support as authorized by Section 2012 Title 10, United States Code.
