

Crescent City projects require traffic controls

June 29, 2020

In order to complete improvement projects, traffic controls are planned in Crescent City soon.

As early as July 1, and ending July 17, Pebble Beach Drive will be traffic controlled between Taylor Street and Preston Island. Typical operations will be between 7 a.m. and 5 p.m., Monday through Friday. A drill rig will be blocking the westerly lane. Residents are asked to avoid this area if possible and expect delays along Pebble Beach. These activities are part of the Pebble Beach Drive Bank Stabilization Geotechnical investigations.

The city also will begin work on a \$4 million-dollar Community Development Block Grant to alleviate flooding on C Street and Front Street. As part of this project, Front Street from B Street to G Street will be closed for several months due to the construction of a new storm drain.

Front Street closures will begin Monday July 6th, 2020. All work is scheduled to be complete in November 2020.

There will be detour signs directing traffic to businesses along Front Street during the street closure. Typical work hours will be 7:30 a.m. to 5:30 p.m. Streets will be closed outside of these working hours also.

If you have questions about either project contact City of Crescent City Public Works Department at 707-464-9506 ext. 226.
