
School district seeks input for 2020-21 survey

May 18, 2020

The Del Norte Unified School District is seeking help from the community to gather the information that will inform its planning for school options for the 2020-21 school year. Completing this survey will help the administration better serve families of Del Norte County.

Officials ask you answer the questions below based on the number of students in your home for the 2020-21 school year. All options would follow the state and local guidelines for health and safety. Three school model options will be presented in this survey. The school district would like to know which you would prefer for your children if all three options were available in the fall.

Take the survey online at <https://bit.ly/2zNQjAi>.

The survey will run for about two weeks.
