

Women's Club and Historical Society Partner to Install Lights at Battery Point Lighthouse

December 14, 2024

“Let’s quit complaining and do something about it,” exclaimed Crescent City Women’s Club project coordinator Liz Freeman.

As its annual project, the Women’s Club has partnered with the Del Norte Historical Society to replace all flood lighting around Battery Point Lighthouse, last Tuesday, just before dawn, as high tide was rapidly approaching. Sean Smith and his crew crossed the shallow waters and self-marooned on the island and began the task of installing flood lights, long absent. The all day project was completed by mid-afternoon, allowing exit during the incoming low tide.

Vickie Baggett, president of the Women’s group organized the effort to give back to the community, was unable to be on hand due to previous travel plans.

Coordinator Freeman last remembers the flood lights were replaced when she was president in 2005.

Christmas Holiday lights will be installed about December 11, weather permitting.

The Crescent City Women's Club and Del Norte Historical Society wish you a joyous Holiday season, Merry Christmas and Happy Hanukkah.
