

If Trees Could Talk...

July 17, 2025

Many Thanks to Gasquet Mike and his trusty drone as he puts the flashlight on long standing human-created blight on our magnificent forests and greenspace.

The following jPegs behind the trees view are horrific.

All the pix are in the County located on Temple, Waldo, Union and Melaney Dr.

If they could talk, what might the trees? “Please save us” “...our not so new human occupants are killing us.”

Drug needles plus horrific trash are destroying Del Norte and City forests within City limits.

Every effort to maintain the tranquil areas are met with almost expedient re-assault. Is not this insanity of misplaced tolerance acceptable to you citizen voters out there?

Gasquet Mike, Thank you and get some new batteries for your big flashlight and your hardworking drone.

Recognition and appreciation to Dept of Fish and Wildlife and County Code Enforcement.

The trees and the neighbors will sure appreciate it.
