

DNLTC seeks input for safety improvements to Elk Valley Cross Road

February 23, 2020

Public input is being sought for potential improvements to Elk Valley Cross Road at a public workshop next week.

In response to concerns expressed by elected officials and the public, the Del Norte Local Transportation Commission (DNLTC) is studying a potential need for improvement along Elk Valley Cross Road, which provides access to homes, businesses, and schools, and connects Highways 101, 199, Lake Earl Drive and Elk Valley Road.

The Elk Valley Cross Road Corridor Plan was developed by the County of Del Norte and DNLTC. The staff will be working in conjunction with the community to assess the traffic hazards, conditions and needs of Elk Valley Cross Road.

The Corridor Plan will study Elk Valley Cross Road between State Route 199 and Lake Earl Drive. A thorough study of the corridor and public input will provide necessary information for future decisions.

Residents and community members most affected by this transportation corridor are invited to submit their experience, observations and opinions to the DNLTC. This vital feedback allows the engineers to better understand the existing problems and recommend solutions for corridor use and improvement if warranted.

The first public workshop was held on June 26, 2019.

The second public open house is from 4:30-6 p.m. on Feb. 27 at Sunset High School, 2500 Elk Valley Cross Rd., in Crescent City. For more information, go to dnltc.org/projects.
