

Letter: Why wait?

July 29, 2023

I have to ask the question about the continued insistence that the war in Ukraine ends before Ukraine can be considered for entry into NATO. This gives Putin a green light to continue the war. With his vast resources he can continue until Ukraine's resources and resolve are exhausted. I know the concerns about a potential for nuclear war with Russia against NATO members, but that potential exists with or without Ukraine's membership.
