

Letter: We can agree on the inevitable

May 10, 2024

I have researched the issue of Wind Power along with the many arguments both pro and con, however in the end everyone in the arguments has come to agree, “it is going to happen.”

I too must agree that it is inevitable. Based on the inevitability of “Wind Power” off our coast, let’s make sure we have a say in as many of the discussions as possible.

I have sent a letter to the Board of Supervisors stating my understanding of their reservations, however holding up the JPA for a process that will occur regardless of their attempts to remove it from the agreement, will only damage the purpose of the Joint Powers and the potential for improvements to Del Norte County.

I asked them to reconsider approving the amended agreement and move forward for the betterment of Del Norte County and its residents. I also stated I would like to see our Board representative take a strong hand in moving the Joint Powers to great things for our community.

PJ Estlund,

Crescent City
