

Letter: Sad and tragic

March 5, 2023

How sad and tragic to see our world and our country seemingly forgetting the words “Never Again” as they refer to the Holocaust. Since that horrific and unbelievable genocide occurred and the world became aware, one would think nothing even close would happen again, but we’ve had many genocides since.

Perhaps not to the scale of the 6 million plus of the Holocaust, but well into the hundreds of thousands. Cambodia, Syria, Sudan, Darfur, etc. Perpetrated by evil men and their henchmen who carry out mass murder and rape for power, money, religion, and blind allegiance to their master.

The Ukraine war with the megalomaniac Putin continuing his unnecessary and cruel murder of innocent people seems headed in the genocide direction. What sickens me is watching political leaders in our country, mostly from the revamped G”Q”P, led by screaming conspiracy theorists like MJT, Lauren Boebert, Matt Gaetz, and many others, wanting to back off our support for Ukraine. Giving the megalomaniac Putin an advantage.

Kevin McCarthy has joined his lunatic fringe paying more attention to Hunter Biden’s laptop and providing video of the violent insurrectionists to proven liar and pabulum spewer, Tucker Carlson.

Most likely so the Fox Mob can edit the video to suit their vision that those thugs were patriots. We haven’t learned much from the phrase “Never Again”.
