

Letter: Price gouging, not inflation

January 7, 2022

As people recover from the COVID pandemic, it is being used as an excuse to inflate prices and gouge customers.

Remember, California has passed an anti-price gouging law in April 2020 that was extended on Dec. 30, 2020. It is price gouging that is driving up prices not inflation. A local business tried to price gouge me, and I reported them to the state attorney general. If you believe a business is price gouging report them. Protect yourself. <https://www.communitypoweredresilience.org/resource/filing-price-gouging-complaint-state>
