

Letter: Ban smoking from the world

August 23, 2021

I think that second-hand smoke is horrible and people should close smoke shops. Second-hand smoke is bad for children because it can increase the risk of asthma attacks, ear infections and sudden infant death syndrome.

It is important to ban smoking in buildings like apartments because smoking increases the risk of second-hand smoking and can kill smokers. I believe that to protect people from second-hand smoke, we should completely ban smoking from the world.
