
Letter: Worse than smoking

August 24, 2021

Letters to the Editor

I think that second-hand smoke is even worse than smoking and people should stop smoking all together. Second-hand smoke is bad for kids because kids breathe in the smoke and the smoke can hurt our lungs. It's important to have policies that ban smoking in multi-unit homes because the smoke can go out of the house or apartment and go into the next house. I believe that to protect people from second-hand smoke, people should stop smoking.
