

Letter: Leave it alone

September 3, 2023

Blowing up the dam has caused a little more damage than anybody thought, huh? the explosives might have started these fires? I'm pretty freaking sure of it those were not fireworks or lightening the other night?

We were looking at the other night blowing the second dam up? People wake up and think about what they're doing here! They're stealing the Klamath River they're diverting it down south. .. Del Norte County after we get out of this fire danger rise up against the Klamath river dam demolitions. The salmon were in the Klamath, I know this for fact, now there isn't any?

Well no wonder after blowing up at least one confirmed dam Copco 2.. don't figure.. I just want to know why people that weren't even born here, don't even live herehave come here to change things this place is perfect leave it alone.
